International Freedom

An informal and independent group has formed, that works for Freedom in Education in different ways.

September 15 is announced as the Day when various manifestations are made throughout the world, to make a stand for Freedom in Education.

Why is this group formed?

To show fellow people, officials, politicians and to some extent the media, that alternative education exists, is and should be legal, and really works, engaging both parents and children!

And that the "results" clearly show success, both academically and socially!
